

I would request that the FCC allow all of the Town of Farmington, Ontario County, NY, be included in the same area code, 585. In conducting town business, I am required to dial a second area code from my home which is in the town. I am required to use the area code to contact my children, which live in the town, but only two mile away and are served by the 315 area code. In light of the fact that the 315 area code must be revised to add additional numbers, it would be the proper and prudent thing to have the area code encompass the town. Thank you.
